A Garden of Herbs

Toole's Special Price List

During the past year Mrs. Toole has talked before many Garden Clubs about her hobby, Herbs. The many pleasant personal contacts and discussions added to much additional personal experience has greatly extended her knowledge of these interesting plants. If you have any problems connected with the use or culture of Herbs, Mrs. Toole will be happy to share her experience with you.

Herbs are divided in a general way between Aromatic Herbs, grown for their fragrance; Savory or Pot Herbs, used as flavoring for other foods; and Medicinal Herbs used in preparing old fashioned remedies. A few unusual Salad Herbs are also offered that seem to be along the border line between Herbs and Vegetables.

Herbs present no special cultural problems. Most of them will be more fragrant and produce more of their aromatic oils if grown in well drained soil that is not over rich. Practically all require full sun. Lovage will thrive in a very rich soil and the Mint family as a whole seems to do well where the soil is constantly moist.

The annual varieties may be own in a part of the vegetable garden if preferred, or they can be combined with the perennial varieties in a special Herb Garden.

As you become more familiar with the use of Herbs in cooking you will find those varieties that fit in best with the likes and dislikes of your family. The more extended use of Herbs in cooking will help to solve the ever present demand for variety in the family menu.

Hardy perennials are indicated by the abbreviation Per., tender perennials and biennials are so marked and annuals are marked Ann.

Mrs. Toole has prepared directions for the use of many of the Savory Herbs. A copy will be included with orders if requested.

Many gardeners are starting special Herb Gardens, often in a formal design following the form of Old English Gardens. Others use many of the Herbs in Shakspeare Gardens while others grow a few for strictly utilitarian puposes in the vegetable garden or in some handy spot near the kitchen.

A great many of the Herbs are ornamental as well as useful and will find a ready place in the mixed border or in the rock garden.

Plants offered are out of 2 1/4 inch pots and are ready to grow along nicely in your garden. Some of the seeds are home grown, the others from various reliable sources. The seed packets contain variable numbers of seeds but a packet of a variety will be enough for any ordinary garden. 12 plants for the price of ten.

	Plants Each	Seeds Package
Anise—(Pimpinella Anisum) Savory, Med., Aromatic, Annual10	.05

	Plants Each	Seeds Package

OTHER THYMES

Practically all the Thymes may be used for flavoring or culinary purposes, and are valuable in this way as well as being most pleasantly aromatic and fragrant planted in the rock garden, rock walls and in steps or between stepping stones or as ground covers.

We have the following varieties in strong potted plants at 15c each; \$1.50 per doz., or in heavier field grown clumps at 25c each; \$2.50 per dozen.

THYMES—**Aureus** (Golden Thyme); **Argento Marginatus** (Silver Leaved Thyme); **Azoricus**; **Lanuginosus** (Woolly Thyme); **Lanicaulis**; **Nitidus**; **Micans**; **Serpyllum**

(Mother of Thyme); *Serpyllum Album*; *Serpyllum Carmineus*; *Serpyllum Coccineus*; *Serpyllum Odoratus*; *Nummularius*.

Thymus Citriodorus Aureus—This variety differs from *T. Aureus* in having distinctly golden margined foliage, smaller leaves, more compact growth and a decided lemon odor25

Thymus Herba-Barona—A prostrate variety variously described as caraway scented and anise scented25

Thymus Serpyllum Annie Hall—A new variety of very compact prostrate growth and lovely pink flowers. Light green foliage25

THYMES COLLECTION—One plant each, 12 different for \$1.50.

Wormwood—(*Artemisa Absinthum*) Med., Per. .15 .05
